## All Driving Schools are the same, right? Simply NOT TRUE.

## What makes 1st Class Driving School First Class and second to none:

1<sup>st</sup> Class does NOT train to a minimal standard. Our objective is to be the facilitator of knowledge and skill. By doing so, our students may enjoy the freedom and independence that comes with driving, while having a solid foundation of choices. This helps to provide a lifetime of collision-free driving.

1<sup>st</sup> Class is a family-owned business established in 1993, still owned and operated by the original owners. We have instructors that have been with us 15+ years, and our turn-over is very low. This contributes to the standards and quality of education received by our clients. We were voted SB Best Driving School for 2019.

1<sup>st</sup> Class is *NOT* a large volume school—our focus is on quality. We keep our class sizes to manageable numbers, which enables students finish their training promptly. We average 4-5 weeks' finish time (depending on the time of the year and the *student's availability*). The DMV allows driving schools to take up to *4 months* to finish a student's driving, which works sorely against a quality training.

1<sup>st</sup> Class *does NOT share driving time* with other students. The student driver is the only person in the car with the instructor, enabling us to focus fully on each individual's needs.

1<sup>st</sup> Class uses *local, state and national data* to drive what we teach in class and behind-the-wheel.

1<sup>st</sup> Class in-car instructors are *trained to use specific routes* to accomplish the learning objectives, allowing us to increase the safety of our student's, while providing a consistent training.

1<sup>st</sup> Class instructors facilitate in-car learning with specific objectives for each lesson, yet flexible to each student's experience and aptitude.

1<sup>st</sup> Class vehicles have an instruction booklet and an iPad to illustrate specific exercises to our students (e.g., turning left across a shared left-turning lane, navigating a service road safely, parallel parking, etc.).

1<sup>st</sup> Class vehicles are well marked (even reflecting at night). We do not have temporary magnetic markings on our vehicles. This is our profession: we take the safety of our students and our instructors seriously.

1<sup>st</sup> Class vehicles have extra Rearview Mirrors AND Sideview Mirrors. We set the standard for using an eye mirror in our State. (It is now required that every driving school vehicle maintain an eye mirror.) An "Eye Mirror" is a mirror between the instructor and student, which allows the instructor and student to converse with one another while driving. Most importantly, when the instructor is trained properly on how to use an eye mirror, they can quickly and effectively facilitate the correction of visual errors. Each of our vehicles have at least 4 extra mirrors, providing instructors with all the tools they need to give the appropriate attention to the student driver along with the other roadway users.

1st Class in-vehicle instructors receive more than **TWICE** the amount of training than the DMV requires.

- 1<sup>st</sup> Class vehicles have *cameras* that face forward at the road ahead and inward at the student and the instructor. The cameras have *infra-red for nighttime driving*, *GPS tracking*, *and speed is recorded*, *as well as audio* of the driving lesson. We also have a camera facing out the back window.
- 1<sup>st</sup> Class was the *first driving school* in the Ark-La-Tex when we opened in 1993.
